

ANTARCTIC HEAVY HOODY JACKET

SKU: 10511377

Antarctic Jacket w/ hood and full windstopper. Unisex.

This is a very warm jacket made with the same dual-layer principle as our [Arctic Collection](#), but with thicker Merino wool on the outside. We have also added a full, soft middle layer with windstopper. The Super Thermo mesh inner layer effectively regulates body temperature, keeps you dry and gives extra isolation.

The jacket is perfect as midlayer on very cold days - or as outer layer in drier conditions when weight is not the primary consideration. Antarctic Jacket is made to the high specifications required for expedition work, while still having the relaxed comfort of everyday wear. Popular for hunting, hiking, mountaineering, professional and casual use.

For optimal moisture transport, we recommend wearing [Super Thermo mesh](#) next to the skin. On cold days you may also add a [Classic merino wool midlayer](#) under the jacket.

Product Features
