

POLAR DOUBLE JACKET

SKU: 10601507

Polar Jacket w/ windstopper. Unisex.

Versatile, two-layer jacket that is suitable for many different outdoor activities and people in tough professions. The jacket is a classic on cold expeditions. It is also a real cozy garment indoors when the weather is cold.

Designed for extreme cold weather and expedition use, the Polar midlayers are among the lightest, most highly insulating and quickest drying on the market. The garments come in a dual-layer construction with the [unique high-wicking Super Thermo mesh](#) on the inside and a hydrophobic, highly insulating synthetic layer on the outside. Polar products are soft, ultra-durable, fully recyclable, and a very good choice for anyone with a wool sensitivity or intolerance.

The jacket has a polo neck, windstopper in the front, full length front zip, zippered low side pockets and one zippered chest pocket. Long raglan sleeves and cuffs with thumbholes that provide extra hand warmth and prevents the fabric from riding up during activity.
